

Partnership Proposal

FROM

Randy Richard

Founder, Sarawak MedChain
randyrjm99@gmail.com

DATE

June 2026

For the marketing partner role. Draft for discussion.

SARAWAK MEDCHAIN

Sarawak's Sovereign Health Record System

CONFIDENTIAL · DRAFT

READ DOC 1 FIRST

This is not a contract. This is my honest opening offer for you joining Sarawak MedChain as a partner. Read it, react, tell me what you would change. Once we agree, we turn it into the formal Founders' Agreement (Doc 3) and sign that (with a lawyer's review).

SECTION 1

The role: Head of Marketing & Growth

What you would own

- **Sales outreach** to clinics, hospitals, and government contacts
- **Customer conversations** - leading pilot pitches with tech support from me
- **Marketing content** - LinkedIn posts, TikTok explainers, website copy
- **Brand development** - how we present ourselves in Sarawak and later Malaysia-wide
- **Grant applications** - Cradle, TEGAS, SDEC (together, you lead the "story" parts)

What I would keep owning

- Product & engineering (all code, features, deployment)
- Product roadmap decisions
- Legal, finance, compliance
- Company direction & fundraising strategy
- Final say on customer contracts

Where we would decide together

- Pricing changes
- Which prospects to pursue
- Hiring decisions
- Anything about company culture / values

SECTION 2

Time commitment tiers (choose one, honestly)

Since we have not discussed this yet, here are the three realistic tiers. Each has a different equity level. **Be honest with yourself about which one is you.**

Tier	Hours / week	Equity	Vesting
A Full-Time	40+ hrs (no other job)	10%	4 years, 1-yr cliff
B Part-Time	15-25 hrs (with other work)	6% + 2% milestone	4 years, 1-yr cliff

C Advisor	Under 15 hrs	3% + 1% per closed customer (cap 3%)	2 years, 6-mo cliff
---------------------	--------------	--------------------------------------	---------------------

All tiers: sweat equity only until first paid contract or funding. Then a real salary conversation.

SECTION 3

Milestones you would own (Tiers A & B)

Timeline	Milestone	Success metric
Month 1	Read everything, meet key contacts, understand product deeply	Reply 60 sec without me
Month 2	First 10 outreach conversations with prospects	10 real convos logged
Month 3	First LOI or signed pilot	1 committed prospect
Month 6	2 more pilots active	3 total pilots
Month 12	3 pilots converted to paid	RM 6,000+ MRR from your channel

SECTION 4

What YOU get out of this

Short-term (0-12 months)

- Real experience running a B2B SaaS from scratch
- Direct access to Sarawak healthcare + government decision-makers
- Your name on the founding team of something real
- A share of the equity - worth zero today but potentially real money later
- Skills that transfer to any future role

Medium-term (12-24 months)

- Real salary (once funded or profitable)
- Reference customers you personally closed
- LinkedIn credibility
- Potential CEO / Head of Sales role at scale

Long-term (2+ years)

- If we succeed at scale: equity could be worth 5-7 figures
- If we succeed modestly: solid resume line + salary + small equity payout
- If we fail: you learned more in 12 months than 5 years of a normal job

SECTION 5

What I am giving up

This is not me giving away equity casually. I am giving up up to 10% of the company I built solo for 7 months. Here is the math:

- If MedChain is worth **RM 5 million** at exit → your 10% = **RM 500,000**
- If MedChain is worth **RM 20 million** at exit → your 10% = **RM 2,000,000**
- If MedChain fails → your 10% = **RM 0** (and I lose 100% either way)

I am making this offer because I genuinely believe you would add more value than 10% dilution costs me. Prove it and we all win.

SECTION 6

The rules that protect BOTH of us

These will be in the Founders' Agreement (Doc 3). Read them now so nothing surprises you later:

Vesting: If you leave before 12 months, you get ZERO equity. After 12 months, 25% vests immediately. Then monthly over 3 more years. Full 100% only after 4 years.

IP assignment: Everything you create for MedChain belongs to the Company, not you personally. If you leave, that stays.

Non-compete (12 months post-departure): You will not join or start a competing blockchain healthcare business in Malaysia for 12 months after leaving. Outside Malaysia is fair game.

Confidentiality: Anything you learn about MedChain stays confidential. Even after you leave. Standard, not personal.

Termination clauses: Either party can walk away. 30-day notice. Your vested equity stays yours.

Sdn Bhd registration trigger: If we have not registered Sdn Bhd within 18 months, either of us can walk away with no penalty.

Founder dispute resolution: 3 days honest conversation → mediation → Kuching High Court. Human process first.

SECTION 7

What happens if you say YES

- **This week:** We meet in person, walk through this document line by line
- **Next week:** Lawyer review of the Founders' Agreement (RM 200-400, I pay this)
- **Week after:** Both sign the Founders' Agreement
- **From that day:** You are my co-founder. Announce internally, update LinkedIn, start executing
- **When Sdn Bhd registers:** Formal share issuance per this agreement

SECTION 8

What happens if you say NO

- No hard feelings. Zero. We are still best friends.
- Whatever we discussed stays confidential - you do not join a competitor
- I keep building. Maybe I find another partner. Maybe not.
- The offer stands for 30 days - if you change your mind, we talk.

SECTION 9

Questions to prepare

Before our next conversation, think about:

- Which tier honestly matches your life right now (A / B / C)?
- What worries you about this deal?
- What would make this a "no" for you?
- What is your dream outcome in 2 years?
- Anything you want that is not in this document?

SECTION 10

My honest advice to you

Take this document to someone older who has seen a co-founder deal before - a family member in business, a mentor, anyone. Get a second opinion before we sign anything.

I want you in. But I want you in **eyes wide open**. Nothing worse than a co-founder feeling tricked 12 months later. This document exists so that never happens between us.
