

## THE PROBLEM

**RM 1.5-3B** est. **Estimated annual MC fraud impact in Malaysia.**

Based on NHCAA global healthcare fraud rate (3-7%) × Malaysia healthcare spend (~RM 60B, MOH 2023). MC-specific data not publicly tracked.

- Paper MCs easily forged
- No employer verification
- Zero audit trail

## HOW IT WORKS

### From doctor's pen to employer's phone - in 5 steps

#### STEP 1

##### Doctor issues

Verified doctor signs in with secure wallet, fills the MC, submits.

#### STEP 2

##### Encrypted & hashed

AES-256-GCM client-side. Hash on public blockchain.

#### STEP 3

##### Patient controls

Grant or revoke access to doctors/employers anytime.

#### STEP 4

##### Employer verifies

Anyone scans the QR code. Verified in under 5 seconds.

#### STEP 5

##### Audit-ready

Every action logged on-chain. State agencies see anonymized aggregates.

## FOR SARAWAK GOVERNMENT

### Designed for state oversight, not vendor lock-in

#### Data Sovereignty

Records reside in Malaysia, not foreign clouds. Encryption keys controlled by patients. Open-source smart contract on public ledger.

#### Compliance Posture

PDPA 2010 compliant. MOH documentation standards. Full immutable audit trail. Read-only oversight dashboard for state agencies.

#### Built in Sarawak

By a 19-year-old Sarawakian founder. For Sarawak's digital economy. Aligned with the Sarawak Digital Economy Blueprint 2030.

#### 30-DAY PILOT

### Free Audit Pilot Programme

- ✓ 30 days, no cost to facility
- ✓ One facility of your choosing
- ✓ Audit report delivered to your office
- ✓ Founder personally supports onboarding
